New You. New Success.

HILUX REVO

EXTRA CAB

The ultimate eye-catcher that outshines from every angle

A superior new outlook with unsurpassed strength and performance.
The leading automobile that responds to life's every demand.

Performance

2GD-FTV

The turbo diesel engine features direct fuel injection by common rail into the cylinders. This precisely controls the air-fuel ratio, contributing to the excellent response and fuel efficiency.

2.4-liter VN Turbo Diesel
with Inter Cooler
110 kW (150PS)/3400 rpm
400 Nm/1600-2000 rpm

6-speed Manual Transmission
Experience the smoothest transition upon every gear shift.

Frame with Integrated Rigidity Mechanism

The frame is designed in order to achieve maximum frame rigidity and strength. This also results in good handling stability even at high speeds, ride comfort, noise and vibration performance and collision strength.

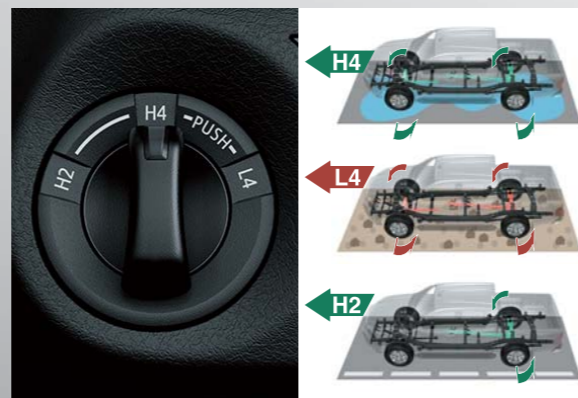

Front Double-wishbone Suspension

Assures good road grip especially on rough terrain.

Rear Leaf-spring Suspension

Absorbs vibration effectively while allowing for enormous load capacity.

Part-time Transfer Switch

Highlighting driver-friendly operation, you can switch between 2WD and 4WD by simply turning the dial switch, even while moving.

Utility

Meters

The easy-to-read meters and a 4.2-inch color TFT (Thin Film Transistor) multi-information display provide the driver with vital vehicle information at a glance.

Audio System

In addition to AM/FM radio and a CD player, the audio system features Bluetooth® compatibility and AUX/USB input terminals for enhanced convenience.

Tilt and Telescopic Steering Wheel with Multifunction Controls

Newly designed adjustable steering wheel gives a better grip, for a more comfortable and smoother drive.

Spacious Deck

Effective length and width of the deck realize great usability when carrying a wide range of cargo.

Safety

Vehicle Stability Control (VSC)

Helps prevent front or rear wheel slip while cornering by reducing engine power and applying brake force to the wheels that require it.

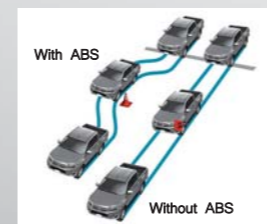

Trailer Sway Control

When towing a trailer, the system detects trailer sway and helps to suppress it by controlling braking and engine output.

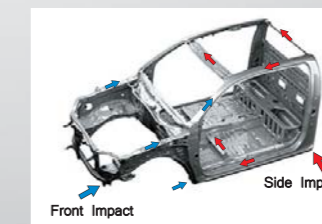

Hill-start Assist Control (HAC)

Helps to prevent the vehicle from rolling backward when starting on a steep or slippery incline.

Anti-lock Braking System (ABS)

ABS helps to prevent the wheels from locking up when braking on slippery roads, or during sudden braking.

Safety Structure

Rigid body structure uses high-tensile steel that absorbs and distributes the force of impact from a collision to protect the occupants effectively.
